

**Would you like to join
our Patient
Participation Group –
Would you like to
have a say about the
services provided by
our practice**

We have an established Patient Participation Group, which has now been in place since 2013. **However, our group is not representational of our patient population.** We would like to encourage our patients to join the group so that it is representative of the practice population **in terms of gender, age and ethnic backgrounds** to give their views about how the practice is doing, to extend patient involvement and also to contribute to the continuous improvement of our services. We value our patients' opinions therefore if you are interested in joining our Patient Participation Group either by attending meetings or involvement via your email address - please complete the forms in the waiting rooms on the table (or ask for one at reception) please hand this back to the receptionist and you will be contacted by the Practice Manager - Yvonne Smith.

Thank You
